Summary

Computer Science Engineering graduate with hands-on experience in software development, AI/ML, and cross-platform application development through industry internships and technical projects. Proficient in Python, Flutter, SQL, Node.js, and AI/ML technologies, with experience developing AI-powered applications, mobile applications, automation solutions, and database-driven systems. Strong foundation in problem-solving, application development, debugging, and data-driven solution design, with practical experience working with modern development tools and collaborative software engineering practices.

Technical Skills

Programming Languages: Python, C, Java, Dart

Frontend: HTML, CSS, JavaScript, Flutter

Backend: Node.js, Express.js

Database: MySQL, SQL

AI/ML: Hugging Face Transformers, NLP, GPT Fine-tuning

Tools/Platforms: Git, GitHub, Linux

Internships

BITSILICA, Hyderabad (Remote)

Jun 2024 – Jul 2024

Software Developer Intern

Hyderabad, India

- Worked extensively with Linux commands including file handling, process management, permissions, shell utilities, and system administration tasks.
- Developed GUI-based desktop applications using PySimpleGUI and Tkinter for efficient user interaction and data collection.
- Implemented Python-based file automation solutions for reading, writing, and processing structured data.
- Applied scripting and problem-solving techniques to automate repetitive tasks and improve productivity.

SkillBanc (Remote)

Jan 2026 – Jun 2026

Software Developer Intern

Hyderabad, India

- Developed responsive cross-platform mobile applications using Flutter and Dart.
- Designed interactive user interfaces and implemented seamless navigation workflows.
- Integrated application features while following modern software development practices.
- Collaborated within Agile teams using Git-based version control and project management workflows.
- Enhanced application performance through testing, debugging, and optimization techniques.

Projects

LawGPT: AI-Powered Legal Assistant | Python, Hugging Face

Mar 2025

- Developed an AI-powered legal chatbot trained on IPC, CrPC, Constitution of India, and Evidence Act datasets.
- Fine-tuned GPT-2 using Hugging Face Transformers on custom legal question-answer datasets.
- Built an interactive Streamlit application supporting real-time legal question answering.
- Implemented NLP-based retrieval and response generation techniques to improve answer relevance.
- Integrated chat history management, session handling, and response export functionality.
- Applied dataset preprocessing, tokenization, and model optimization techniques for improved performance.

Student Management System | DBMS, SQL, CRUD

Apr 2024

- Designed and implemented a database-driven management system for students, faculty, attendance, and course records.
- Developed complete CRUD operations for efficient data management and record maintenance.
- Created optimized MySQL database schemas ensuring efficient storage and retrieval of data.
- Improved administrative efficiency through centralized academic record management.

User Data Management Application | Python, Tkinter, PySimpleGUI

Jul 2024

- Developed desktop GUI applications for collecting and managing user information.
- Implemented automated data export functionality supporting JSON, XML, TXT, and XLSX formats.
- Designed intuitive interfaces to improve user experience and data accessibility.
- Applied file handling and data processing techniques using Python.

Education

ICFAI Foundation for Higher Education, Hyderabad

2022 – 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.68

Certifications

- AWS Academy Cloud Foundations
- FreeCodeCamp - Backend Development and APIs
- FreeCodeCamp - JavaScript Algorithms and Data Structures
- FreeCodeCamp - Responsive Web Design
